Business Unit – DuPont Disinfectants

Accuratus Laboratory Services conducts the following tests and protocols :

PHARMACEUTICAL

- Method Development & Validation
- Raw Materials Testing
- QC Release Testing
- Stability Studies
- Disinfectant Qualification
- Microbial Identification
- Water System Validation & Monitoring
- Cleaning Validation
- Container Closure Integrity Testing
- Bacteriophage Screening
- Filter Integrity Testing
- Mycoplasma

• TESTING SERVICES

- Environmental Monitoring & Cleanroom Testing
 - Microbial Identification
 - Compressed Air Testing
 - Routine Environmental Monitoring
- Microbiology
- Virology
- Analytical Chemistry
- Water System Validation & Monitoring
- Microbial Identification
- Disinfectant Qualification

MEDICAL DEVICE

- QC Release Testing
- Sterilization Validation
- Reusable Medical Device Validation
- Disinfectant Qualification
- Microbial Identification
- Cleanroom Services
- Water System Validation & Monitoring
- Package Validation Testing & Accelerated Aging

Business Unit – DuPont Disinfectants

June 11th 2015

To whom it may concern

The Laboratory Test, reference A15462 to support the efficacy of Rely+On Virkon® to inactivate the Human Corona Virus was conducted at the accredited, FDA and EPA authorities of the United States of America, Accuratus Laboratory Services, 1285 Corporate Centre Drive, Suite 110, Eagan, MN 55121, U.S.A. (tel: +1(887)287-8378) (<http://www accuratuslabs.com>). The efficacy test was conducted to the Test Guide OCSP 810.2200 and Protocol AN01072613.COR.

The full test report, 27 page document, is copied with this summary.

Combining more than 50 years of experience from ATS Labs and Microtest Labs, Accuratus Labs identifies, analyzes and controls microbial activity to meet FDA standards for medical devices and biopharmaceuticals, as well as EPA regulated antimicrobial and consumer products.

- Accuratus has been performing microbiological work for more than 25 years.
- Our specialized microbiology group possesses years of experience performing qualification work on many different surface types using a wide range of disinfectants.
- Accuratus has an internal collection of ATCC organisms ready for use onsite, plus the ability to identify and cryopreserve client environmental isolates.

Efficacy testing is one of the accredited competencies (of those listed on page 2), where the Coupon Test system is employed: *Coupon Testing Using the Swab Recovery Method*

- For established facilities with environmental programs and trending.
- Coupons are prepared from representative surfaces present in the client's clean room environment.
- The disinfectants are sprayed on the surfaces using the method and contact time captured in the client's cleaning procedures.
- To ensure implementation of a proper disinfection program, the FDA recommends the use of the facility's environmental isolates. However ATCC organisms may be used as well.

Antec International Ltd. has been using the Microtest Laboratory and ATS Laboratory who combined to form the accredited Accuratus Laboratories for over 27 years.

Using 'state of the art equipment the EPA/FDA accredited, Accuratus Laboratories conduct the following services for Government, Institution and Private Business to support the Global Health.

Antec International Limited
